

Here is the discussion forum for this part of the course. Please either post your comments/observations/questions or share your creations.

Let us suggest some topics of discussion and optional projects:

SUGGESTED TOPICS

- The sprite framework that we discussed in this course can be greatly improved to support other types of sprite sheets or alphabet sprite sheets for writing text made of sprites. If you improve the given code, please share!
- Please share some nice demos of your own with more sprite sheet examples found on the Web!
- If you find any good tools or tutorials for creating sprite sheets, please share!

OPTIONAL PROJECTS

- Try to improve the last example presented in the course with the woman moving in all directions.
- Here is a complete set of sprite sheets for the robot postures. Try to make a nice demo that uses all the postures!
 - Download [an archive with all robot sprites](#).
